Yash D Singh

Developer & AI Enthusiast

Final-year BCA student with hands-on experience in Python, web development, databases, and cybersecurity. Skilled in building practical projects using Flask, JavaScript, Firebase, and SQL, with experience in network scanning, security testing, and cryptography. Interested in AI, cybersecurity, web development, and emerging technologies, with a strong focus on continuous learning and practical problem-solving.

Experience

Practical Learning & Hands-on Experience

July- September 2025

- Worked in Kali Linux environment for security-based projects.
- Executed terminal commands for file handling, environment setup, and script execution.
- Practiced debugging and error handling during project development.
- Experience in organizing project folders and documentation.

Cybersecurity Intern

Platform: EdiGlobe
Duration: July- September 2025

- Completed a hands-on cybersecurity internship focused on practical security concepts and tools.
- Worked in a **Kali Linux environment** to understand system security and network behavior.
- Gained exposure to **ethical hacking fundamentals**, vulnerability analysis, and secure system practices.
- Improved understanding of **networking concepts**, IP addressing, and terminal-based execution.
- Documented project workflows and outcomes in a structured manner.

Achievements

University Tech Events & Competitions

- **Top 3 Performer** in multiple university-level technical events and coding competitions.
- Recognized for strong **problem-solving skills**, logical thinking, and technical accuracy.
- Actively participated in cybersecurity and programming-related events organized by the university.
- Collaborated with peers during team-based technical challenges.

Project Certifications

Platform: EdiGlobe
Date: 31-10-2025

- Completed a structured cybersecurity program with one minor & 3 major project
- Earned Project Completion Certification upon successful evaluation

Projects

Network Scanner Tool

Technology: Python, Kali Linux, Networking

- Developed a Python-based network scanner using **Nmap.**
- Scanned target IPs to identify live hosts & open ports.
- Performed service detection & basic OS fingerprinting.
- Displayed scan results in a clear, readable format.

Encryption and Decryption Tool

Technology: Python

- Built a Python-based tool to encrypt and decrypt text messages
- Applied basic cryptographic logic to ensure data confidentiality.
- Strengthened understanding of cybersecurity fundamentals and secure data handling

Technical Skills

Programming & Scripting

- HTML/CSS
- JavaScript
- Python(Pandas)
- Java
- C/C++
- DBMS(Mysql,Oracle)

Cybersecurity

- Cybersecurity Fundamentals
- Ethical Hacking Basics
- Network Scanning & Host Discovery
- Basic Cryptography Concepts

Networking

- Networking Fundamentals
- IP Addressing & Subnet Basics
- Port & Protocols
- Local Network Analysis

Operating Systems & Tools

- Kali Linux
- Virtual Environment (VE) Setup
- Linux Command Line (Terminal)

Soft Skills

- Logical and analytical thinking
- Quick learner with strong curiosity for cybersecurity
- Good communication and teamwork skills
- Ability to follow instructions and work step-by-step
- Time management and self-discipline

Education

Bachelor of Computer Applications(BCA)

Sam Higginbotham University of Agriculture, Technology, Sciences
Final Year – Currently Pursuing
Prayagraj, Uttar Pradesh, India
